

# Laser Therapy Use Cases

Laser therapy offers a multitude of applications that can address various conditions and enhance the well-being of your patients. From pain management to accelerated healing and improved mobility, the versatility of laser therapy is truly remarkable. Laser therapy's therapeutic properties reduce inflammation, decrease pain, and accelerate the body's natural healing process, allowing your patients to enjoy a better quality of life. From noses to toes and ears to rears, discover some of the most popular use cases for laser therapy today.

## Post-Surgical/Wounds

- Abscesses
- Amputation (post-op)
- Aural hematoma (post-op)
- Burns
- Cranial cruciate ligament repair (post-op)
- Cystotomy (post or intra-op)
- Declaw (post-op)
- Degloving injury
- Enterotomy (post or intra-op)
- Hematoma (post-op)
- Incisional healing
- Orthopedic/Fracture repair (post-op)
- Post-operative pain relief
- Ischemia/reperfusion injury
- Skin graft (post-op)
- Spay/Neuter (post-op)
- **Wounds**

## Dental

- Post-dental cleaning (pain management)
- Extractions (pain management)
- Gingivitis
- Indolent ulcers
- Periodontal disease
- Stomatitis
- Tooth root abscess

## Abdominal Disorders

- Diarrhea (various causes/symptoms)
- Ileus
- Inflammatory bowel disease
- Pancreatitis
- Peritonitis

## Neurological Disorders

- Acupuncture
- Brachial plexus injury
- Canine cognitive disorder
- Degenerative myelopathy
- Discospondylitis
- Fibrocartilaginous embolism
- Geriatric onset laryngeal paralysis polyneuropathy
- **Intervertebral disc disease**
- **Lumbosacral disease**
- Meningitis
- Myositis
- Neuropathy
- Paresis/paralysis
- Peripheral nerve injury
- Rehabilitation

# Laser Therapy Use Cases

## Urinary Tract Disorders

- Chronic kidney disease
- Cystitis/FUS/FLUTD
- Cystotomy (post or intra-op)
- Lower urinary tract infection
- Urinary tract obstruction (pain management)

## Thoracic Disorders

- Asthma
- Bronchitis
- Collapsing trachea (acute distress relief)
- Infectious tracheobronchitis
- Laryngeal paralysis (acute distress relief)
- Pneumonia
- Pulmonary fibrosis
- Rhinitis/sinusitis
- Smoke/chemical inhalation

## Musculoskeletal Disorders

- Acupuncture
- Biceps tendonitis
- Cranial cruciate ligament disease (pain management)
- Elbow dysplasia
- Epiphysitis
- Fracture healing (delayed or nonunion)
- Hip dysplasia
- Hypertrophic osteodystrophy
- Iliopsoas injury
- Immune-mediated polyarthritis
- Muscle injury (sprains/strains)
- Myositis
- **Osteoarthritis/degenerative joint disease**
- Osteochondritis dissecans (pain management)
- Panosteitis
- Rehabilitation
- Tendon/ligament injury

## Dermatologic Disorders

- Abscesses
- Anal sacculitis
- Aural hematoma (post-op)
- Burns
- Demodicosis (pain management)
- Eosinophilic granuloma complex
- Feline acne
- Hygroma
- Infections (bacterial and fungal)
- Interdigital cyst
- Juvenile cellulitis
- Lick granuloma
- Mastitis
- Non-inflammatory alopecia
- Otitis
- Perianal fistula
- Pododermatitis
- Pyoderma
- Pyotraumatic dermatitis
- Skin graft (post-op)
- Vasculitis
- Wounds
